

EMPMA212S ParaMotion Series  
Dual Horizontal Desk Mount

## ParaMotion Series Dual Horizontal Monitor Support Arm

Dual monitor working has been proven to increase productivity and decrease processing errors. Dual monitors enable access to information and images simultaneously therefore allowing more efficient multi-tasking between applications.

With this in mind ErgoMounts have developed the ParaMotion Series Dual Horizontal Mount. The ParaMotion is the perfect solution for both home and office applications. As well as improving productivity it also helps to reduce eye, neck and back strain. Offering upto 525mm of height adjustment and upto 500mm of reach the mount perfectly meets the ergonomic criteria of 95% of adults.

The ParaMotion Dual Arm offers finger touch height adjustment and articulation without the need for additional tools whilst the unique parallel head unit enables positioning of the arm whilst maintaining the angle of the monitor.

The mount can support upto 18kg on a single 35mm pole in a horizontal mounting configuration. The monitors can

be moved freely from landscape to portrait and tilt +90°/-40° enabling repositioning dependant upon user.

The ParaMotion Dual Arm mounts easily to the desk via either a desk clamp or bolt through desk mount grommet fitting. The grommet fits neatly through the cable management hole reducing the need for additional drilling.

Available in a silver finish.
